Distance to line 'STOP' ahead Double carriageway ends Narrow road on the right (left if inverted symbol) Narrow road on both sides Distance to line 'Give Way' ahead Crossing crossroads at front curve T-junction with priority over vehicles of the right staggered junction Traffic merging left to front - Priority through route is indicated by the wider line Double curve first to the left (symbol can be reversed) Fold) Fold to the right (or left if the symbol reversed) Roundabout irregular road sign below some signs Two-way traffic crosses two-way traffic road straight forward Open or swing bridge ahead Aircraft flying low or sudden noise from the aircraft Falling or stones dropped Traffic signs not in use Slippery traffic signs Steep hill down Steep Hill Up Gradients can be shown as a reason that is. 20% = 15 Tunnel ahead Trams crossing ahead Level crossing with barrier or gate ahead Level crossing without barrier or gate ahead Level crossing without fragile barrier (or blind or disabled if shown) pedestrians likely to cross the road ahead Zebra crossing overhead electric cable; plate indicates maximum height of vehicles that can safely pass Available width of space to the indicated Head marked Deviation of the route to the left (or right if inverted chevrons) Light signs ahead in the level passage, airfield or bridge Miniature warning lights at wild animal level crossings Wild animals Horses or ponies Horses or ponies Travel cycle ahead Risk of ice Traffic queues probably ahead Distance over which the humps of the road extend Other danger; board indicates nature of danger Soft winds Side winds Bridge Hump Quayside warning plate or river bank Risk of grounding These signs are intended to alert the driver to the hazards/situation that are ahead on the road. The driver must obey them for their safety. Although the violation of these road signs does not attract any legal action, they are very important to the fact that avoiding them could result in serious accidents. The precautionary signs are triangular shaped with red border. This sign warns of a Right Hand Curve on the road ahead. This helps you in maneuvering the vehicle accordingly and nullifies the possibility of accident due to the sudden appearance of curves. This sign warns of a Left Hand Curve on the road ahead. This also helps you maneuver the vehicle accordingly. You have time to slow down and put your eyes on the curve. It also reduces the possibility of accident due to the sudden appearance of curves. Curves of hair pins are sharp curves especially on hilly roads. This sign warns of a sharp curve to the on the road ahead. It gives time to reduce the speed to manage the curve and also puts the driver's eyes on the curve. The absence of this sign can lead to serious accidents, as sharp turns on hilly roads are not easily seen. This sign warns of a sharp left turn on the road ahead. These are essentially erected on hilly roads. Gives time to slow down to manage the and also puts the driver's eyes on a curve. The absence of this sign can lead to serious accidents, as sharp turns on hilly roads are not easily seen. This road sign indicates the actual design, i.e. a kind of Z formation of the road ahead. He warns the driver about the zigzag curve to the right. The driver should slow down when seeing this signal and maneuver the vehicle with caution. This road sign indicates the actual design, i.e. a kind of Z formation of the road ahead. He warns the driver about the zigzag curve to the left. The driver should slow down when seeing this signal and maneuver the vehicle with caution. This road sign indicates that there is a steep climb ahead and the driver must prepare to climb up and set the vehicle into gear. Most often, these signs are found on hilly roads where steep climbing and descent are a normal part of the trip. This road sign indicates that there is steep descent ahead and the driver must prepare for the descent by putting the vehicle into gear. One should not attempt to accelerate the descent, as it loosens the grip of the vehicle. Most often, these signs are found on hilly roads where steep climbing and descent are a normal part of the trip. When the width of the road decreases and the road merges into a narrow road, there is a possibility that a high-speed vehicle may collide with oncoming traffic. This sign warns the driver to be careful, as the road ahead is narrow. This sign means that the road ahead is wide. The width of the road increases after this board and therefore traffic should adjust accordingly. Sometimes the road converges on a bridge that is less wide than that of the road. This sign is erected in front of such bridges that are narrower than the road. The driver should slow down and observe oncoming traffic for safe driving. This sign indicates the slippery condition of the road ahead. This condition may be due to water infiltration or oil spillage etc. The driver must invariably slow down the vehicle when seeing this signal to avoid accidents. This board is usually erected on hilly roads where loose land or gravel keeps falling on the road. The driver should drive slowly and carefully after this signal, as little carelessness can cause major accidents here. This road sign indicates that there is a bike path crossing the main road. The driver must carefully cross this intersection, as the cyclist can cross the main road safely. Pedestrian is the king of traffic. This sign warns the driver to slow down or stop the vehicle and allow the pedestrian to cross the road. The part of the road is also demarcated in white tracks known as zebra crossing. In the zebra crossing the Pedestrian has the first right in the This sign indicates that there is a school ahead/nearby. The driver is required to slow down the vehicle and drive carefully to avoid accidents. Children often try to cross the road running or make unprecedented moves so that their safety always drives carefully close by This board shows that there is some repair/cleaning etc. being carried out on the road and the work is involved in it. People working on the road need traffic safety and therefore this sign is erected before the repair site on the road. The driver should drive slowly and carefully swerve to ensure the safety of work. This sign indicates that there is a high possibility that the cattle will stray on the road. Cattle on the road can cause major accidents as the animal reacts unpredictably in traffic. So drive carefully wherever you see this sign. On mountainous roads, rocks fall on the road during landslides in extreme climates. This sign shows that the road ahead is prone to such a rock fall and the driver must drive carefully to avoid accidents. Sometimes the roads are intercepted by the river without the bridge supply. These roads are connected via ferry service. This sign indicates that there is a ferry service to cross the river. This sign says there's a road crossing ahead. This signal advises that the vehicle should be slowed down and the intersection should be crossed with caution looking both ways. This sign indicates that there is a gap in the divider of a road and there is a u-turn provision. The driver should slow down and take relevant lane to avoid any accident. This sign says there's a curve on the right side of the road, in addition to the straight motion of the road. This sign indicates the driver in planning their route and also warns about the additional provision of ads. This sign says there's a left-hand bend on the road, in addition to the straight motion of the road. This helps the driver in planning his route and also warns about the additional provision of the road. This road sign shows the actual formation of the road ahead. The road is divided into two forming a form of Y. This helps the driver to manage the intersection carefully. This sign indicates that there is a left and right curve available on the straight road with small distance between them. It's an intersection that doesn't allow the road to cross. This sign says there's a T-junction on the road ahead and there's no forward movement. Traffic has to turn left or right. This helps the driver plan his movement on the road. This sign is erected on arterial roads before crossing an important road. He warns the driver that the road will cross an important road where traffic can be heavy and faster. This allows the driver to slow down and safely use the intersection. Round-About is a substitute for a road crossing. Allows a good flow of traffic without the aid of traffic lights. This sign indicates that there is a round-about ahead and the driver to take the relevant lane well before maneuvering the round-about. This sign warns that there is a dive in the road ahead. This board helps the to reduce the speed to cross the dive on the road. Sometimes there is a hump on the road or created intentionally to slow down traffic or caused for any other reason. This signal signal the driver he must reduce the speed to cross the hump comfortably. Often the road passes through toll/check point stations etc. You can find barriers in these places. This sign indicates that there is a barrier ahead on the road and the vehicle has to stop there. This sign indicates that there is a railway crossing that is not manned by the staff. This unprotected railway crossing has to be crossed by the driver himself with great caution after ensuring that there is no train on the nearby track. This sign also says that the unprotected level crossing is 200 meters ahead. This sign indicates that there is a railway crossing that is not manned by the staff. This unprotected railway crossing has to be crossed by the driver himself with great caution after ensuring that there is no train on the nearby track. This sign also says that the unprotected level pass is 50-100 meters ahead. Often the road crosses the railway line. This sign indicates that there is a railway crossing that is guarded by a person. The driver should take extra precautions and act accordingly. This sign also says that the saved level pass is 50-100 meters ahead. Often the road crosses the railway line. This sign indicates that there is a railway crossing that is guarded by a person. The driver should take extra precautions and act accordingly. This sign also says that the saved level pass is 50-100 meters ahead.
